CAREER OBJECTIVE

Junior Software Engineer with a strong foundation in web application development, backend integration, and cloud-hosted systems. Experienced in building and supporting HTML, CSS, JavaScript, PHP, React, and Node.js-based applications, integrating APIs, validating data flows, and working with databases. Brings hands-on experience across the full development lifecycle, including coding, debugging, deployment support, and collaboration in agile teams. Seeking to contribute as a developer in a modern software engineering environment.

TECHNICAL SKILLS

Programming Languages	HTML, CSS, JavaScript, React.js, PHP, React Router, Node.js, Tailwind CSS
Operating Systems	Windows OS, Microsoft Windows (Word, Excel, PowerPoint, Project, Outlook)
Tools & Platforms	Visual Studio Code, Jira, Trello, Asana (Defect & Sprint Tracking) Office 365 (Excel-based Test Reporting) Click Charts, BPMN Modeler, Software Ideas Modeler
Integration & APIs	REST API integration and validation Third-party system integrations (CRM, marketing platforms)
Marketing & CRM Platforms	Oracle Eloqua Marketing Cloud Zoho CRM & Campaigns
Databases	MongoDB, MySQL (CRUD operations, data validation, query optimisation)
Web & Application Technologies	Bootstrap, React, WordPress, PHP-Yii
Business & Process Analysis	Business Process Analysis Workflow & Automation Modelling
Test Automation & Quality Engineering	Behat (PHP BDD Testing Framework) Functional, Regression & Smoke Testing ACID Email Testing (Rendering, Deliverability & Links) A/B Split Testing & Experiment Validation Form, API & Data Validation
Certification	AWS Certified Developer Associate 2018

PERSONAL PROJECTS

- **KOVHAR — E-Commerce MERN Stack App** | https://kovhar-frontend.vercel.app/ | https://github.com/sumitshinde559/kovhar-backend

- Built a full-stack e-commerce web application for a footwear brand using React, Node.js, Express, MongoDB, and REST APIs
- Implemented JWT and bcrypt-based user authentication with protected profiles, wishlist, cart, address, and order management functionality
- Developed REST APIs for product management, category-based filtering, price sorting, inventory and size tracking, reviews, and order processing
- Deployed the frontend on Vercel and developed the application using an AI-assisted workflow with Claude and ChatGPT

Meetup Clone — MERN Stack App |
https://meetup-frontend-react.vercel.app/ | https://github.com/sumitshinde559/meetup-backend

- Built a full-stack semi-clone of Meetup.com using React, React Router, Node.js, and REST APIs
- Implemented client-side routing, state management, and responsive UI with Tailwind CSS
- Deployed on Vercel using AI-assisted development workflow (Claude, ChatGPT)

Bucket Biryani Kolhapur | bucketbiryanikolhapur.com

- Designed and built a responsive business website using Tailwind CSS and HTML
- Optimised design and styling using Google Gemini and AI-assisted tooling

EDUCATION

Master of Business Information Systems **Feb 2016 – Dec 2017**
Australian National University, Canberra, ACT
Key Subjects: Business Administration, Business Analysis, and Business Analytics

Bachelor of Computer Science and Engineering **Jul 2011 – Jul 2014**
Shivaji University, India
Key Subjects: Computer Programming, Computing, and Professional Practices

PROFESSIONAL SUMMARY

Developer Programmer **Sep 2024 - Mar 2026**
Ameya Informatics, Australia

- Developed and maintained WordPress-based web applications and landing pages
- Implemented API-driven integrations between WordPress, Zoho Forms, Zoho CRM, Zoho Campaigns and RTO Data Cloud
- Built and supported data synchronisation pipelines for lead capture and automation workflows
- Debugged and resolved issues related to API failures, data mismatches, and automation logic
- Created and maintained test data and validation scripts to support development and reporting
- Collaborated with stakeholders to refine requirements and improve system reliability

Marketing Cloud Web Developer Programmer **Jan 2022 - May 2023**
Marketing Cube, Australia

- Developed and customised emails, landing pages, and forms using HTML, CSS, JavaScript and platform-specific scripting
- Implemented dynamic content, segmentation logic, and personalisation rules
- Integrated Eloqua with CRM systems and SMS gateways via APIs
- Troubleshot and fixed tracking, integration, and data flow issues
- Performed API and integration testing between Eloqua, CRM and SMS gateways
- Supported deployment and release activities for enterprise-scale marketing platforms

Systems Administrator / Web Developer **Jan 2021 – Jun 2021**
Aim Institute of Health & Sciences, Australia

- Maintained and enhanced Moodle LMS and organisational websites
- Supported user authentication, access control, and system configuration
- Tested user roles, permissions and authentication flows
- Assisted with backups, data integrity, and production issue resolution

Web Developer **Dec 2019 – Apr 2020**
ACT CABS Pty Ltd, Australia

- Improved website performance, load times, and responsiveness
- Implemented new features and UI enhancements
- Supported AWS-hosted deployments and production releases
- Fixed cross-browser and mobile compatibility issues

Web Developer Intern **Nov 2019 – Apr 2020**
Australian National Character Check Pty Ltd, Australia

- Built test applications to validate third-party API-driven bankruptcy checks
- Performed API testing and response validation
- Verified data accuracy and document generation outputs
- Logged and tracked defects and test results in Asana

Junior Developer **Jan 2019 – Mar 2019**
ToukanLabs, Australia

- Supported development of PHP (Yii) web application
- Implemented backend changes and assisted with bug fixes
- Used Behat BDD scenarios to validate application behaviour
- Verified database-driven outputs using MySQL
- Collaborated with developers using Jira and Git

PERSONAL ATTRIBUTES

- **Team player:** Communicate and collaborate with team members to efficiently address work-related challenges, facilitate teamwork and healthy work environment
- **Problem-solving skills:** Solved work and life problems using planning, evidence-based management techniques
- **Willingness to learn:** Taking continuous efforts to learn and improve skills required to excel in the IT workforce environment

ACHIEVEMENTS/AWARDS

- Awarded a full-funded scholarship to study Masters in The Australian National University from the Maharashtra Government, India
- Developed a sustainable IT system prototype for one of the largest dairy producers in India during the final year engineering academic project
- Helped local bricklaying business in Canberra to generate more than $35000 in revenue in one year with web and email marketing
- Contributed to achieving 200% student enrolment growth with a marketing automation project for a well-known university in Australia

VOLUNTEER WORK/EXTRA-CURRICULAR ACTIVITIES

- Providing guidance to students from Maharashtra state, India, to apply for and get the scholarship to study in Australia
- Attending meetups
- Contributed to building and establishing the Bucket Biryani Kolhapur business within 8 months through volunteer efforts
